How to manage information overload

Workers need information and context to do their jobs.

Is too much information a bad thing?

Time in a typical day spent searching for or

consolidating information.

Average number of people who workers interact

with on a daily basis in and outside their organization.

of workers need 4+ apps, and 13% access 11+ apps

on a daily basis.

Apps in a typical software-as-a-service

(SaaS)-based organization.

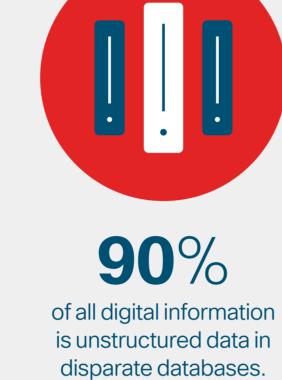

Information overload wastes valuable time, creates

ineffective interactions, and hurts productivity.

than half of their day

in meetings.

experiences.

Not finding the right information leads to a 16% productivity impact.

Information without context

just adds confusion.

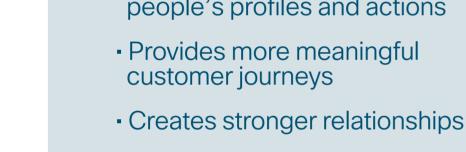

So what is Cognitive Collaboration? The combination of artificial intelligence (AI) with cloud

communications and multiple enterprise data sources brings

people together with more context. This approach: Removes friction points

 Creates greater relevance to achieve higher efficiency Enhances productivity Inspires innovation

- Creates more engaging customer experiences
- **Key aspects of Cognitive Collaboration**
 - **Business workflows** People context Predicts based on prior behaviors Delivers relevant information about people's profiles and actions

Data insights Learns from user profiles, feedback,

interactions

 Delivers relevant information, bridging the productivity gap

responses, preferences, and

Process efficiencies

Optimizes workflows

eliminates silos

Deepens knowledge and

Automates tasks and events

Workspace intelligence

and outcomes

 Makes collaboration more intuitive Adapts to different types of user interactions and meetings

Recommends, identifies, anticipates

Improves processes, experiences,

Accelerates decision making

Improves worker productivity

Enhances collaboration

and lifetime value

Customer experience

Evolves the contact center from

reactive care to predictive care

Empowers agents with context

Improves the customer journey

to improve first-contact resolution

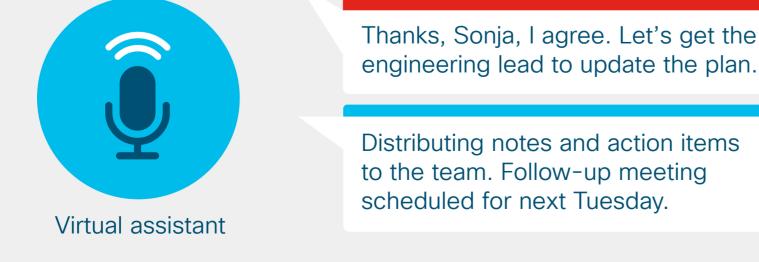

Cognitive Collaboration empowers

Competitive advantage

Accelerates communications and business processes Improves responsiveness

Enhances customer interactions

- results-oriented interactions.
- how to address the latest alert? Raj, the sensor data shows we need to accelerate our response time. Raj, I've updated our digital whiteboard to highlight a possible solution.

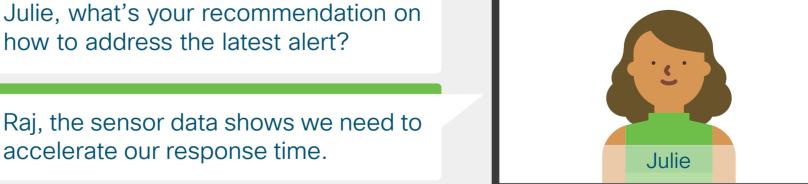

to the team. Follow-up meeting scheduled for next Tuesday.

engineering lead to update the plan. Distributing notes and action items

Cognitive Collaboration dynamically puts relevant information at workers'

fingertips, enhancing their interactions and minimizing information overload.
