WESTWIND

Solutions for Enterprise-Wide Procurements Contract

80TECH26D2128

NASA SEWP VI Solutions for Enterprise-Wide Procurement Contract Holder

SEWP contracts focus on Information Technology products: servers, peripherals, software, supporting equipment and associated training, installation and implementation solutions.

Why Westwind?

Founded in 1992, Westwind Computer Products, Inc. provides comprehensive, integrated IT solutions to Federal Government agencies throughout the US and overseas.

With a variety of contract vehicles and Small Business certifications, including Minority-Owned and Woman-Owned designations, Westwind helps you make efficient procurement decisions. Westwind is ISO 9001:2015 certified, follows industry standards for warehouse security, and practices secure supply chain management.

People. The Westwind Pack works hard to build and maintain strong relationships with both our OEM partners and our customers.

Access. Westwind partners with hundreds of major distributors to provide our customers with the best products and the most reliable services.

Commitment. With more than 25 years serving the Federal Government, the Westwind Pack is adept at navigating the procurement process and delivering effective results, regardless of scale.

Knowledge. Our solution engineers hold certifications from many of the industry's leading technology manufacturers and service providers.

We Know the Protocols

We're familiar with the secuirty and tracking requirements involved in the logistics and delivery of sensitive equipment to restricted facilities. Westwind can:

- Physically and electronically segregate sensitive equipment during storage and shipping to prevent tampering
- Configure packaging to accommodate special circumstances or requirements
- Track equipment via RFID to provide visibility throughout the delivery cycle
- Validate equipment authenticity to keep the supply chain free of grey market and/or refurbished items.

SEWP Overview

NASA SEWP VI – The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support - more than 50,000 orders a year.

What's In Scope for SEWP VI?

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC/ AV) solutions and services. Technology is ever-evolving and for that reason SEWP's processes enable our Contract Holders to add new commercial technology and IT services to their contract daily, as requested by our customers. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape. SEWP is composed of three (3) scope categories detailed below. If you would like SEWP to determine if your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov and we will quickly review and provide feedback.

The SEWP Contracts were awarded by scope category, the three categories are:

- Category A - ITC/AV Solutions
- Category B - Enterprise-Wide ITC/AV Service Solutions
- Category C -Mission-Based ITC/AV Service Solutions

The SEWP PMO maintains a Quote Request Tool that allows customers to initiate Requests for Quote (RFQs) to initiate orders. The Quote Request Tool is accessible through the SEWP website.

Ordering Process

The internal ordering process of each Agency varies. The process and accompanying forms for Purchase Requests (PR) and Delivery Orders (DO) that are issued against a SEWP contract is defined by the issuing Agency, not the NASA SEWP Program Management Office (PMO). The typical process is for an end-user to determine a requirement and generate a Purchase Request (PR).

The PR along with any necessary funding information is sent to that Agency's procurement office which results in the issuance of a DO. Any valid Federal Agency DO form, and the associated Delivery Order number may be used. The NASA SEWP Program Management Office (PMO) does not issue DOs - these much be issued through the issuing Agency's procurement office. The SEWP Program Management Office (PMO) reviews, processes and tracks issued DOs and forwards them to the Contract Holder(s).

Some Agencies have special requirements for issuing IT Delivery Orders. It is the Issuing Agency's Contracting Offiers' (COs/KOs) responsibility to be aware of any Agency-specific policies regarding issuing requirements under the SEWP Contracts for issuing Agencies to use other intermediary procurement offices, except as directed through their own internal policies.

If modifications are made to any order, these modifications must also route through the SEWP Program Management Office (PMO).
